

UNITED STATES GOVERNMENT

Memorandum

TO : C/GSD

DATE: 26 January 1965

FROM : DAD/S&D

SUBJECT:

25X1A

About a month ago we wrapped up a number of technical parameters pertinent to [REDACTED]. These parameters were briefed to DD/S&T. Subsequent to that, GSD was to put out a piece of paper summarizing these numbers which represented the requirements of the system.

I understand that QRB or the facility is now assembling equipment and will shortly be testing. I would like to see the wrap-up piece of paper by the end of the week so that the tests can represent the agreed upon technical requirements for the equipment.
